THE MOST RELIABLE SOLAR HOT WATER SYSTEM FOR ALL.

Emmvee is an intelligent solar solutions producer born from an idea to implement green energy to better use. We aim at providing universally designed products to support all kinds of contemporary and sustainable living. Amidst our industrial product range, Photovoltaics and Solar Water Heating Systems are our strongest since inception in 1992.

Are you tired of hard water corroding your water heater?

Almost 80% of Indian homes have complaints about hard water problems. In the period of long usage, hard water sedimentation affects the performance level of a regular heater and leads to its decay. To solve hard water problems once and for all, we introduced Solarizer Ultra.

Solarizer Ultra is a power-pack performer that meets your water heating needs without the worry of corrosion due to hard water, leaks or blockages and time constraints while enabling comfort at all times. Rest assured, it is one of the most dependable choice of all. It also has a full-plate absorber with a highly selective German coating which provides more area to absorb sunlight. As a result, it emits almost no radiation, enabling faster water heating.
